EXPERIENCE

Research Intern – VR Game Development

DRID, IIIT, Noida (May 2025 - July 2025)

- Built VR game features using Godot, Python, and GDScript with head and eye movement-based controls.
- Enabled hands-free, accessible gameplay for differently abled users.
- Improved motion stability and coordination by ~50%.

App Dev Intern

Tavant Technologies, Noida (May 2026 - Present)

- Building foundational knowledge in **Generative AI technologies**, including LLM applications, prompt engineering, and AI-assisted software development workflows.
- Participating in technical onboarding programs and self-paced learning modules to strengthen software engineering and application development skills.
- Completing structured training on the **Software Development Life Cycle (SDLC)**

PROJECTS

ASD Detection System – Minor Research Project

Tech: Machine Learning, Feature Engineering, Multimodal Data Analysis

- Built a multimodal ML system using physiological, audio, and visual data to detect sensory overload; applied structured, prompt-style query design to classify multimodal inputs using logical reasoning and information synthesis.
- Engineered feature extraction and preprocessing modules for multimodal signals to generate behavioral indicators.
- Trained and evaluated ML models to classify environments into Calm, Risky, and Overload states.
- Trained models (Random Forest, SVM) achieving 0.967 ROC-AUC score.
- Live Demo: <https://asd-ml.onrender.com/>

JuristiQ – LegalTech Web Platform

Tech: React.js, Node.js, MongoDB, Express, CSS, JavaScript

- Built a full-stack web platform to manage legal clients, cases, hearings, and payments for advocates and law firms
- Implemented RESTful API integration with client-side form validation and error handling for reliable data submission
- Reduced manual case-tracking effort for advocates by 35%
- Live Demo: <https://juristi-q.vercel.app/>

CERTIFICATIONS

- OCI 2025 Certified AI Foundations Associate (Oracle) — covers LLMs, GenAI, and ML fundamentals. Credential: [link](#)
- Tata GenAI Powered Data Analytics Job Simulation (Forage) — designed AI prompts using ChatGPT and GenAI tools, synthesized data insights, built structured analytical workflows. Credential: [link](#)

SKILLS

- **Programming:** C, C++, Python, JavaScript, SQL
- **GenAI tools:** Claude, ChatGPT, Gemini, vo.dev
- **Core Skills:** Data Structures & Algorithms, DBMS, REST APIs, OOPs, Artificial Intelligence (AI), GenAI
- **Machine Learning:** Supervised Learning, Feature Engineering, Time-Series Analysis
- **Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib
- **Web:** React.js, Node.js, Express, MongoDB, MySQL, HTML, CSS
- **Tools:** Git, GitHub, VS Code, Postman, Linux, Arduino IDE, Godot

EDUCATION

Jaypee Institute of Information Technology (JIIT), Noida

B.Tech in Computer Science and Engineering

July 2023 - July 2027

CGPA: 8.3

Police DAV Public School, Ambala

Senior Secondary, class: XII (CBSE)
Percentage: 94.2%

St. Joseph's School, Ambala

class: X (CBSE)

Percentage: 97.6%

EXTRA CURRICULAR

Technical Coordinator

uCR Hub, IIIT Noida (May 2025 - May 2026)

- Mentored junior members in robotics projects.
- Led obstacle-avoidance robot development.
- Organized robotics workshops and technical sessions.
